

GenAI and You!

Highlights from CIDM's 2024 benchmark survey on
GenAI and technical communication

The Survey

- 107 industry professionals representing hardware, software, and manufacturing sectors
- Participants include those who:
 - Have implemented GenAI, are investigating GenAI, and are not looking to implement GenAI
 - Are championing, leading, managing, and consulting on GenAI efforts

68% of participants are active in GenAI efforts

Technical communication professionals are driving GenAI efforts as champions, leaders, and consultants

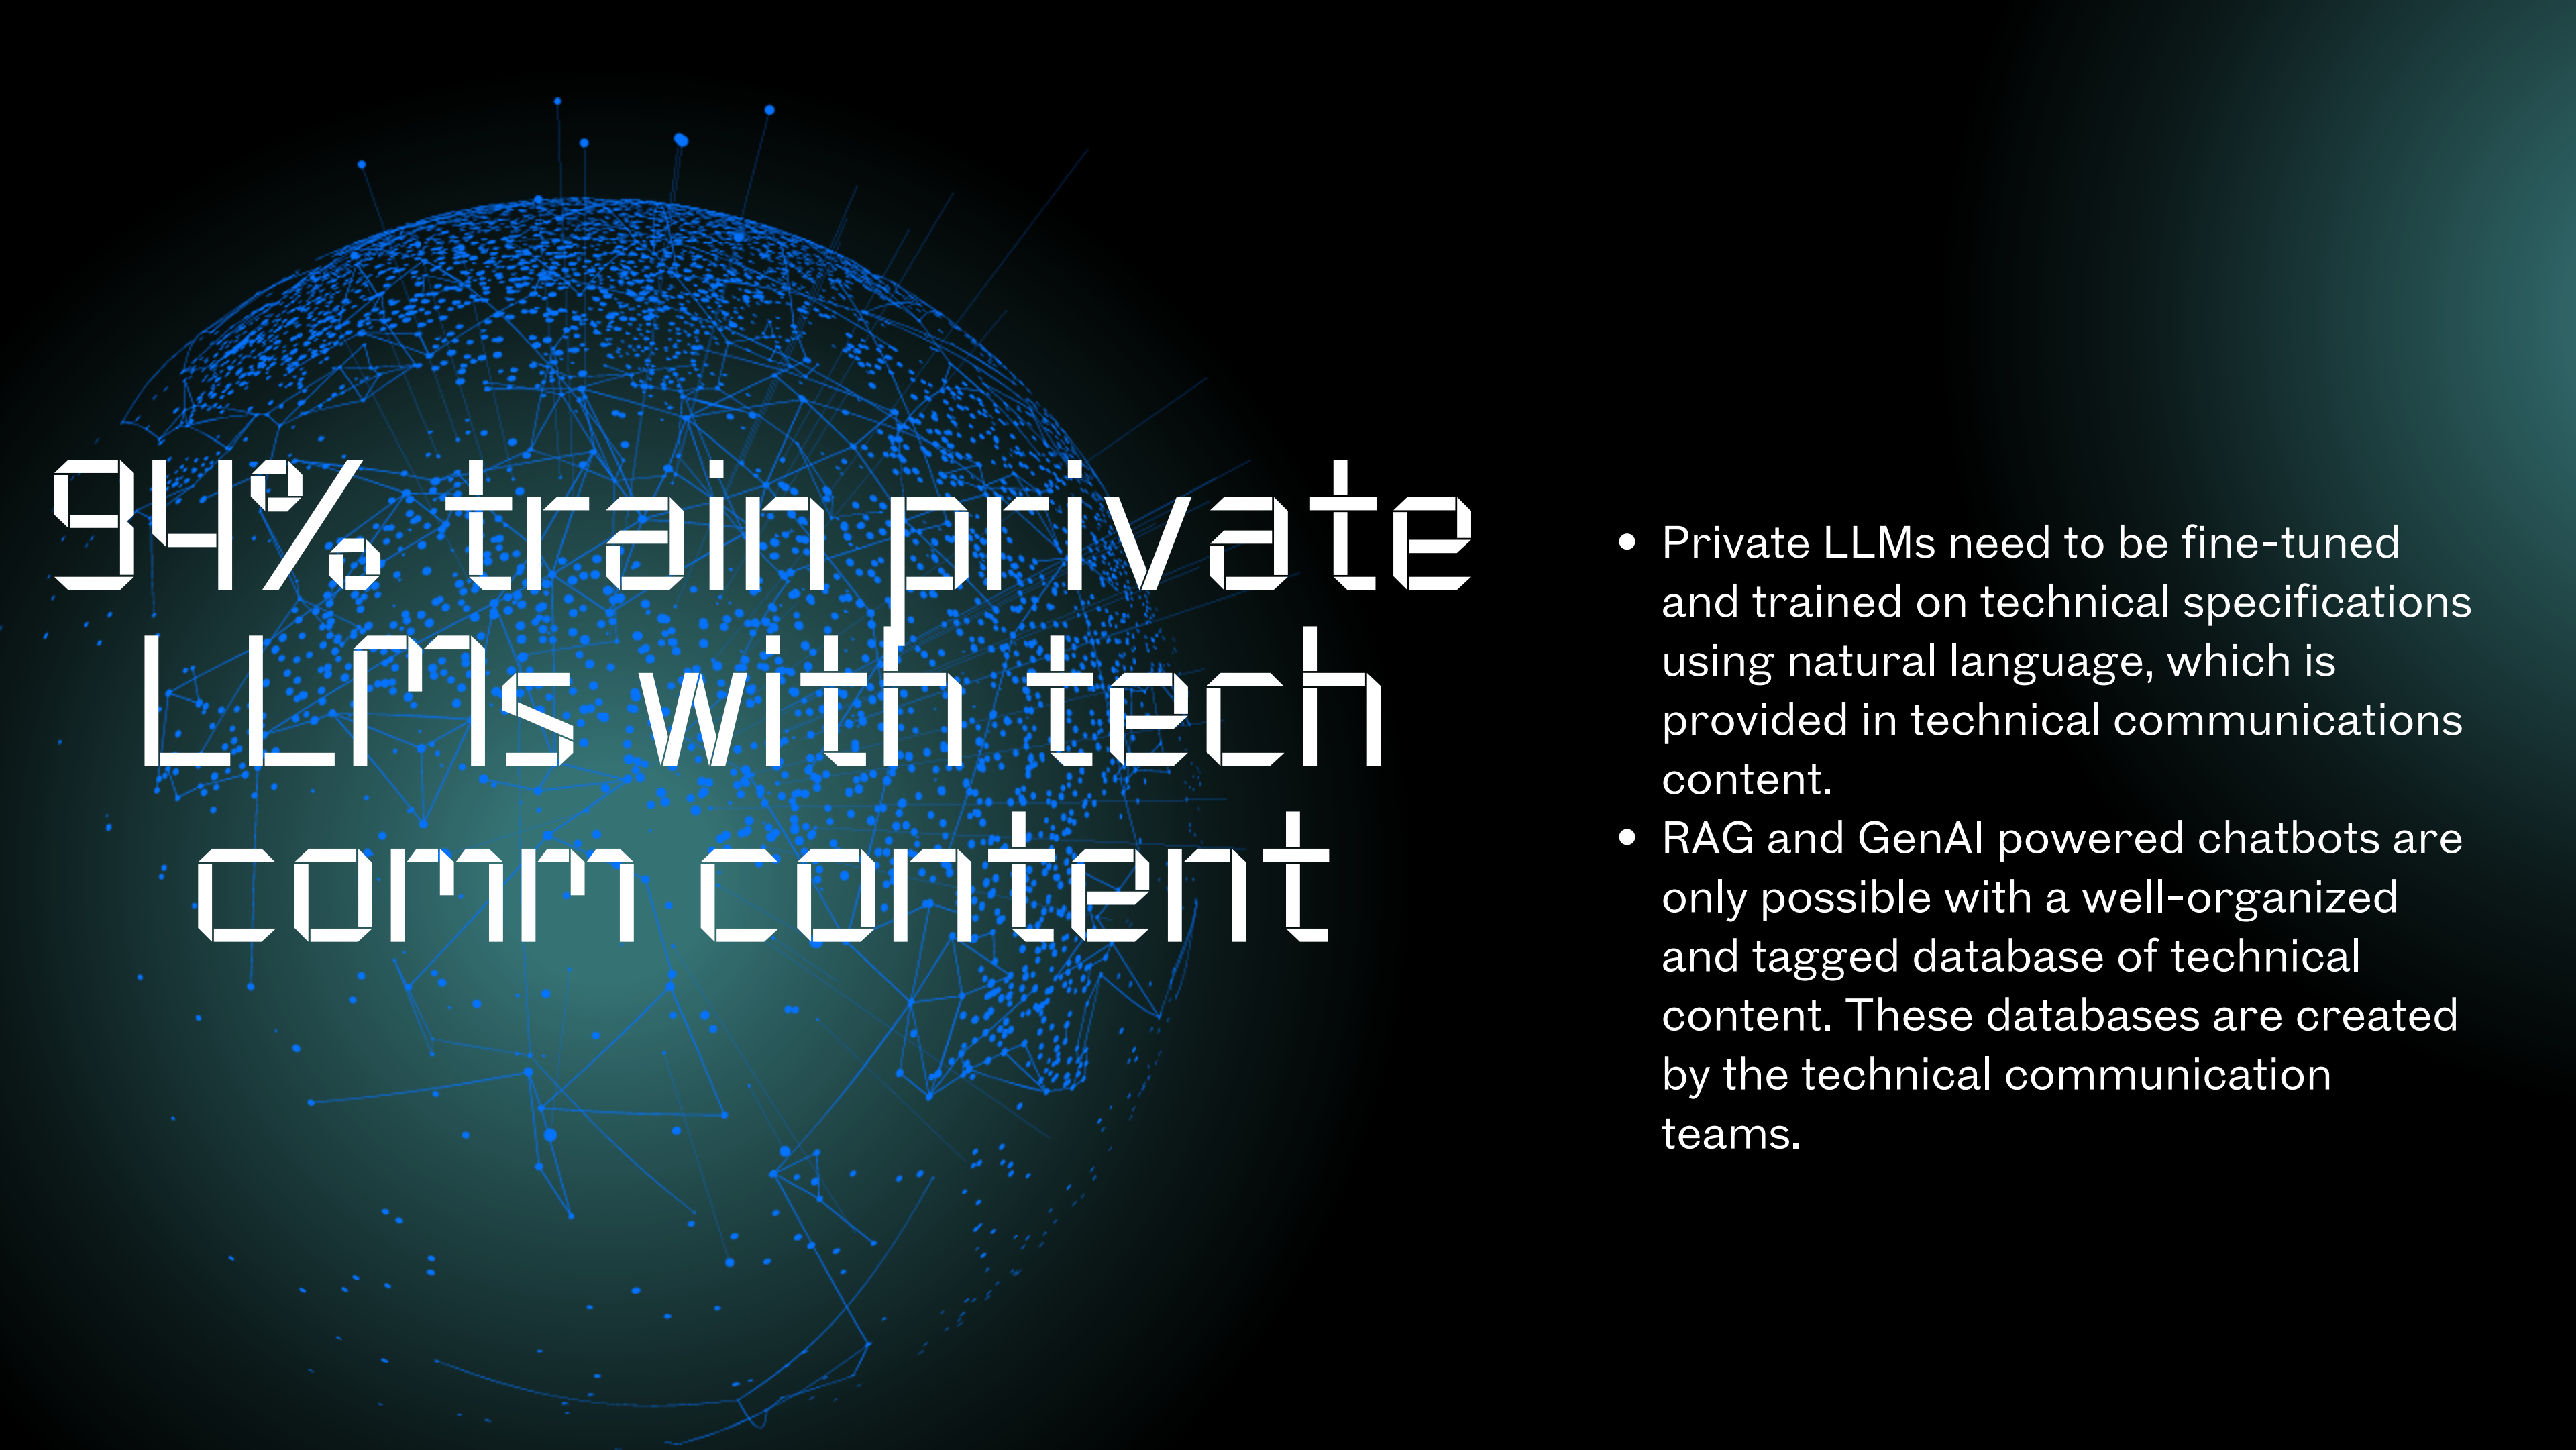

Driving GenAI

- Private LLMs are built on the foundation of the public ones.
- They help secure your data and allow you to control fine-tuning and RAG.
- Legal agreements prevent the LLM companies from training the public models on your data.

73% of
organizations use
private LLMs

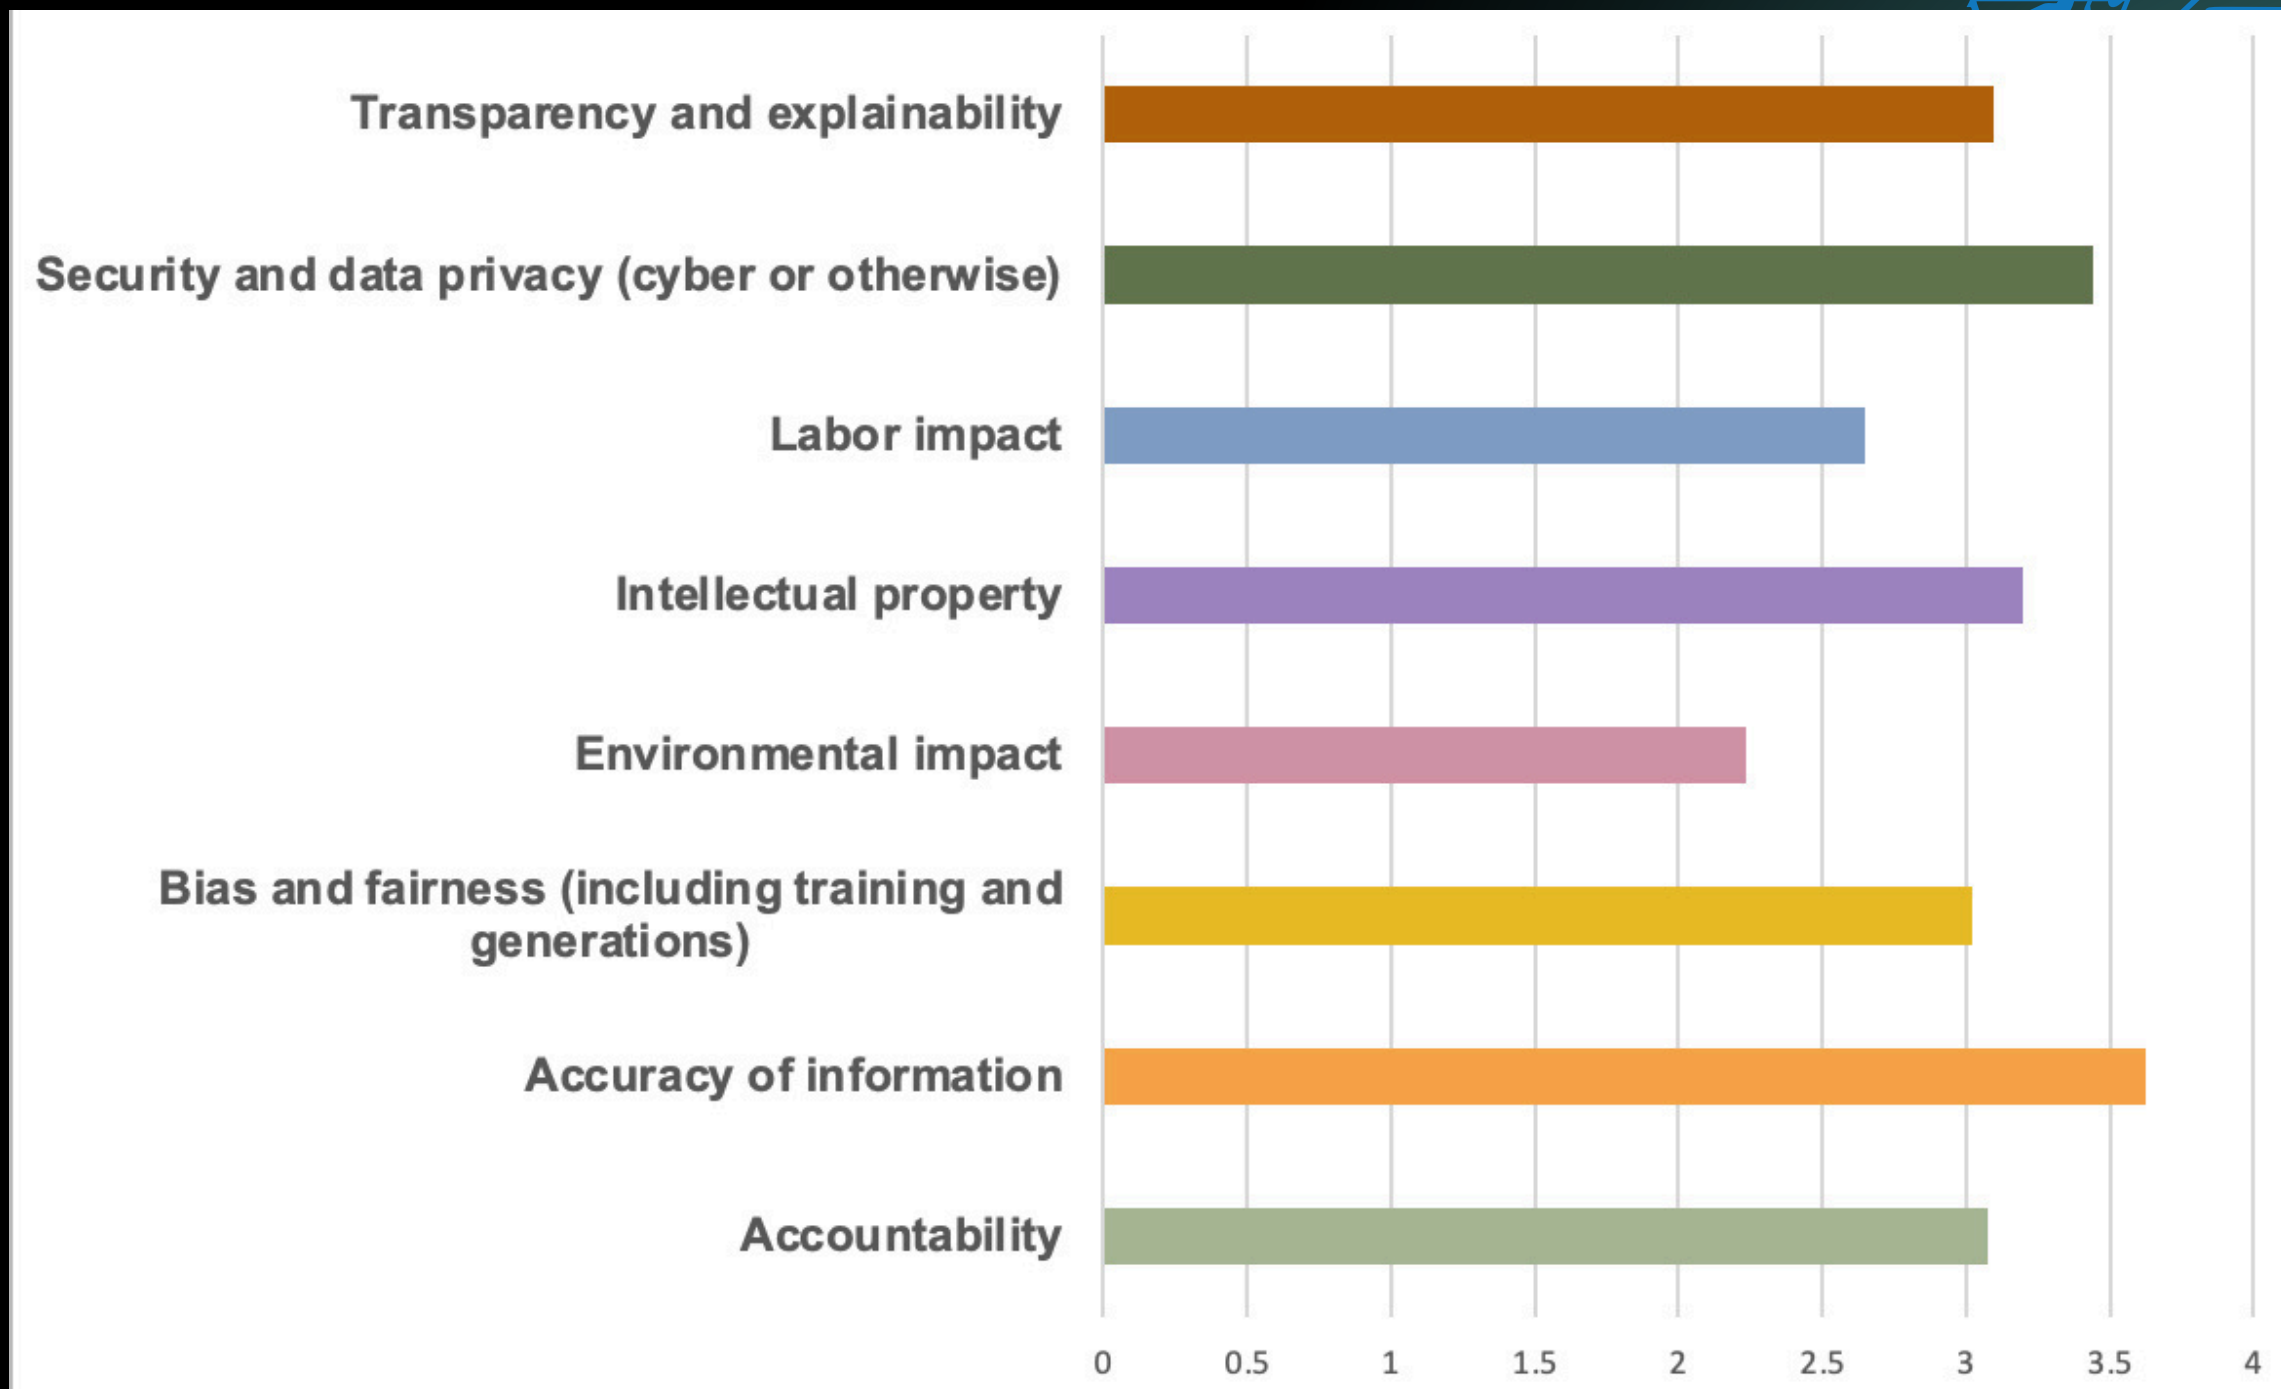

94% train private LLMs with tech comm content

- Private LLMs need to be fine-tuned and trained on technical specifications using natural language, which is provided in technical communications content.
- RAG and GenAI powered chatbots are only possible with a well-organized and tagged database of technical content. These databases are created by the technical communication teams.

Ethical Considerations at Implementation

- Data security, intellectual property, and accuracy top the list.
- Accuracy of information is a critical element for technical communication to add high-value work to their organization.
- Private LLMs are a reliable solution for many of these concerns.

Post-GenAI Content Creation Process

HITL: HUMAN IN THE LOOP

Incorporating GenAI into Your Content Strategy.

- Offered several times a year
- 8 sessions, once a week
- Morning and afternoon classes available
- Learning objectives:
 - Evaluate the strengths and weaknesses of GenAI
 - Monitor the trends in GenAI
 - Identify use cases for GenAI
 - Evaluate GenAI models
 - Communicate to leadership about GenAI
 - Write a business case for GenAI
 - Understand legality and ethical concerns and mitigations
 - Write a content strategy as it applies to GenAI
 - Build an implementation plan for incorporating GenAI

Using GenAI to Write and Deliver Content

- Offered several times a year
- 8 sessions, once a week
- Morning and afternoon classes available
- Learning objectives:
 - How to write for GenAI
 - Prompt engineering
 - How to specialize and train a model
 - Implementing GenAI into your content creation process
 - How to use GenAI in your content creation process
 - How to use GenAI in your content delivery strategy
